

Alternating Pressure Mattress

Product Features

- Eight horizontal foam-filled air cylinders offer self-adjusting support from the head to the lower legs
- Dual-layered, foam zones for pressure redistribution
- Uniquely-designed heel slope to help reduce pressures in critical heel section
- Firm perimeter assists in keeping the patient centered, provides side-of-bed seating support, and facilitates ingress/egress
- Replaceable 4-way stretch cover is moisture vapor permeable and fluid proof
- Available with or without raised side rails
- Choice of Therapeutic Solutions: Non-Powered Dynamic Therapy or add a pump for Alternating Pressure
